

Company Profile

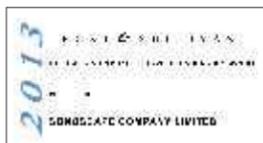

Since its establishment, SonoScape has been committed to providing high quality medical equipment for the healthcare sector. SonoScape specializes in the development and production of diagnostic ultrasound solutions. By introducing advanced imaging techniques, SonoScape has improved diagnostic accuracy and therefore enabled better health outcomes. Since 2002, SonoScape has reached and benefited millions of people. With the world in mind, SonoScape will continue providing more effective and accessible healthcare solutions, through persistent innovation and passion for life.

Quote from the Analyst of

"The Frost & Sullivan Award for Growth Leadership is presented to the company that has demonstrated excellence in capturing the highest annual compound growth rate for the last 3 years...The sales of ultrasound devices contribute an overwhelming proportion of total revenue, helping the company strengthen its leading position to outperform the competitors in the marketplace. With increasing penetration of mid-to high-end ultrasound devices, SonoScape is expected to see significant growth potential in the future..."

Company Milestone

- 2002: Company Founded in Shenzhen, China
- 2003: Released SSI-1000: the 1st 15" Portable Color Doppler system in China
- 2004: Released SSI-2000: the 1st PC platform Color Doppler system in China
- 2005: Received the "High Technology Company" award from the PRC government
- 2007: Received "CHINA TOP BRAND" award in the Medical Equipment Industry
- 2007: Released the 1st Real time 4D ultrasound system in China
- 2008: Received "European Entrepreneurial Company 2008" award from FROST & SULLIVAN
- 2008: Received "Flagship Company" award in the Medical Equipment Industry in China
- 2009: Received "Product Quality Leadership Award 2009" from FROST & SULLIVAN
- 2011: Received the Reddot 2011 Product Design Award for S20 in Essen, Germany
- 2013: Received "Ultrasound Market Growth Leadership Award, 2013" from FROST & SULLIVAN
- 2014: Received the iF Product Design Award 2014 for S9 in Munich, Germany
- 2014: Received "Company of the Year in Ultrasound Market, 2014" from FROST & SULLIVAN

ISO 13485

CE 0197

SonoScape has always been committing to providing the best products for the harmonious relationship between human beings and animals. As it is our mission, SonoScape releases S8V, a high-end portable color Doppler system, which is the best clinical solution for veterinarians. It is incorporated with a lot of latest ultrasound technologies, such as Tissue Doppler Imaging, Anatomic M mode, Panoramic Imaging and so on, which are rarely seen on veterinary ultrasound systems. The advanced imaging technologies, user-friendly ergonomic design and powerful veterinary software packages make S8V an unique professional vet ultrasound scanner.

Excellent Imaging and Processing Technologies

μ-scan Technology

μ-Scan uses real-time image processing algorithm to eliminate speckle and noise artifacts, and enhance tissue margins and borders.

Tissue Doppler Imaging

TDI is a new technique to display velocities of normal and pathologic myocardial structures during the cardiac cycle, facilitating clinical researchers to analyze and compare motions of different parts of animal hearts.

Steer M mode

By detecting ventricular wall motion in animals, clinicians and researchers can make more precise cardiac diagnosis and research reports.

Panoramic Imaging

Ultra-wide sight promises a clear vision and maximum of information on tissue and lesions, facilitating clinicians to make quick and precise diagnosis for large lesions.

The Main Features

- + 15-inch anti-glare LCD monitor
- + CFM, PDI, PW, CW, Steer M mode
- + THI, TDI, Panoramic Imaging, Volumetric 4D Imaging
- + IMT (intima-media thickness) measurement
- + DICOM worklist, USB port, VGA

Professional Design for Veterinary Use

- + Powerful veterinary measurement package
- + User-definable veterinary exam modes
- + Specialized veterinary body marks
- + Professional veterinary transducers

Other Strength Features

- + Two standard transducer sockets compatible with most color Doppler transducers of SonoScape
- + Built-in high capacity Li-ion battery
- + High mobility, slim and compact trolley
- + Abundant and professional veterinary transducers
